

C37.16 Working Group Report

IEEE Power and Energy Society
Switchgear Committee
Low Voltage Switchgear Devices Subcommittee
September 2010 – Las Vegas, NV
Reported by Allan Morse, Chair
September 27, 2010

1. Introductions

Working Group meeting called to order September 27, 2010 at 10:20am PST
Group introductions were made and roster was circulated.

2. Patent Slides

The IEEE Patent Slides were reviewed with the group.

3. Attendance

Twelve (12) Working Group members present. Quorum was present.

Attendees:

Dave Dunne (M)
Mike Flack (M)
Keith Flowers (M)
Jeff Hidaka (M)
Anurag Jivanani (M)
Chad Kennedy (M)
Michael P. Lafond (M)
Jeff Mizener (M)
Allan Morse (Chair)
Darryl Moser (M)
Amy Rowell (M)
John Shullaw (M)

4. Review PAR

The group reviewed the PAR which had been drafted by the chair and Doug Edwards following the Spring Meeting of LVSD. The purpose of the revision to C37.16 is to update the document to cover nominal voltages up to 1000V ac. Edits were made to the PAR and it was approved for submission. The PAR will be submitted in the timeframe to allow approval prior to the Spring Meeting.

5. Review Changes to C37.16

The working group briefly reviewed the required changes to add the new nominal voltage ratings. The chair will obtain the latest Word document of C37.16 and update to the latest template prior to the Spring 2011 Meeting. Dave Dunne agreed to review and update Table 1 and Anurag Jivanani will review Table 2 to reflect the addition of 690 V ac and 1000 V ac. The chair will also update the text related to voltages in 1.1, 3.2, and 3.7. Table 6 will be removed as it is now obsolete.

Meeting was then adjourned.

Respectfully submitted by Allan Morse, Chair
