

# ADSCOM Report

Fall 2010

## 1. DOCUMENT STATUS

The following is a list of documents up for administrative withdrawal if no action is taken to extend their life. I ask that all subcommittee chairs review these documents and notify me of the appropriate action to be taken.

If revision or reaffirmation is chosen and the action cannot be completed by the submittal deadline, please let me know approximately when the reaffirmation will be submitted; or when the PAR for revision will be submitted to NesCom and the estimated completion date for the revision project. I will contact Dave Ringle at IEEE Headquarters and request an extension of the life for the current standard.

If there is no further interest in a standard and the recommended action is to withdraw the document, no ballot is required. It will be administratively withdrawn in December 2010. {Please note that standards that are administratively withdrawn can no longer be reinstated via reaffirmation. The only method for reinstating an administratively withdrawn standard is to initiate a revision process, starting with a PAR.}

I MUST NOTIFY IEEE HEADQUARTERS BY THE 18 OCTOBER 2010 SUBMITTAL DEADLINE (FOR THE DECEMBER 2010 STANDARDS BOARD MEETING SERIES). IF NO RESPONSE IS RECEIVED, THE STANDARDS IN QUESTION WILL BE PLACED ON THE AGENDA FOR ADMINISTRATIVE WITHDRAWAL.

### **The following standards are currently on the Administrative Withdrawal List:**

**1247-2005** IEEE Standard for Interrupter Switches for Alternating Current, Rated Above 1000 Volts

**C37.21-2005** IEEE Standard for Control Switchboards

**C37.30-1997** IEEE Standard Requirements for High Voltage Switches

**C37.34-1994** IEEE Standard Test Code for High-Voltage Air Switches

**C37.35-1995** IEEE Guide for the Application, Installation, Operation, and Maintenance of High-Voltage Air Disconnecting and Interrupter Switches

**C37.36b-1990 (R1996)** IEEE Guide to Current Interruption with Horn-Gap Air Switches

**C37.37-1996** IEEE Loading Guide for AC High-Voltage Air Switches (in Excess of 1000 V)

**C37.48-2005** IEEE Guide for the Application, Operation, and Maintenance of High-Voltage Fuses, Distribution Enclosed Single-Pole Air Switches, Fuse Disconnecting Switches, and Accessories

**C37.60-2003** IEEE Standard Requirements for Overhead, Pad-Mounted, Dry Vault, and Submersible Automatic Circuit Reclosers and Fault Interrupters for alternating current systems up to 38 kV  
[Also **C37.60-2003/Cor 1-2004**]

**C37.63-2005** IEEE Standard Requirements for Overhead, Pad-Mounted, Dry-Vault, and Submersible Automatic Line Sectionalizers for AC Systems

**C37.66-2005** IEEE Standard Requirements for Capacitor Switches for AC Systems (1 kV to 38 kV)

**C37.74-2003** IEEE Standard Requirements for Subsurface, Vault, and Pad-Mounted Load-Interrupter Switchgear and Fused Load-Interrupter Switchgear for Alternating Current Systems up to 38 kV

**C37.010-1999 (R2005)** IEEE Application Guide for AC High-Voltage Circuit Breakers Rated on a Symmetrical Current Basis

**C37.012-2005** IEEE Application Guide for Capacitance Current Switching for AC High-Voltage Circuit Breakers

**C37.100-1992 (R2001)** IEEE Standard Definitions for Power Switchgear

## 2. PROJECT STATUS

The following is a list of projects which will expire if no action is taken to extend their life. I ask that all the working group chairs review this list and take the appropriate action as follows:

If these projects will not be submitted to RevCom by the submittal deadline for the December 2010 meeting, you need to take one of the following steps:

1. Request an extension for the project (PAR). Please note that extension requests are usually granted from one to two years. Significant justification must be provided for an extension request which exceeds two years.

2. Request withdrawal of the project (PAR).

Log on to myProject (<https://development.standards.ieee.org/my-site>) to submit a request for either of these actions under the link for 'Submit a PAR'. Once submitted, the request to Extend an Approved PAR or the request to Withdraw an Approved PAR will be placed on the agenda of the next scheduled NesCom meeting. NesCom will make its recommendation based upon the information provided.

**The following PARs are due to expire and action is required:**

**PC37.17** Standard for Trip Systems for Low-Voltage (up to 635 V) AC and General Purpose Low-Voltage (up to 600 V) DC Power Circuit Breakers

**PC37.30.1** Standard Requirements For High Voltage Air Switches And Interrupting Switches for Alternating Current, Rated Above 1,000 Volts

**PC37.74** Standard Requirements for Subsurface, Vault, and Padmounted Load-Interrupter Switchgear and Fused Load-Interrupter Switchgear for Alternating Current Systems up to 38 kV

If there is no response to this notification by the 18 October 2010 NesCom/RevCom submittal deadline, the PAR will be recommended for administrative withdrawal at the 8 December 2010 IEEE-SA Standards Board meeting.

These lists were generated in September of 2010 and may no longer reflect the correct status of every document and project. Please advise me as to any updates in the Subcommittee minutes. I will contact the SC Chairs later in the year to establish the action that will be reported to the Standards Board.

Reported 30 September 2010.

Michael Wactor  
Standards Coordinator
