

ADSCOM Report

Fall 2011

1. STANDARDS COORDINATORS REPORT

- a. Erin Spiewak is now our permanent Liaison. She may be reached at e.spiewak@ieee.org

2. DOCUMENT STATUS

The following is a list of documents up for administrative withdrawal if no action is taken to extend their life. I ask that all subcommittee chairs review these documents and notify me of the appropriate action to be taken.

If revision or reaffirmation is chosen and the action cannot be completed by the submittal deadline, please let me know approximately when the reaffirmation will be submitted; or when the PAR for revision will be submitted to NesCom and the estimated completion date for the revision project. I will contact Dave Ringle at IEEE Headquarters and request an extension of the life for the current standard.

If there is no further interest in a standard and the recommended action is to withdraw the document, no ballot is required. It will be administratively withdrawn in December 2011. {Please note that standards that are administratively withdrawn can no longer be reinstated via reaffirmation. The only method for reinstating an administratively withdrawn standard is to initiate a revision process, starting with a PAR. }

I MUST NOTIFY IEEE HEADQUARTERS BY THE 17 OCTOBER 2011 SUBMITTAL DEADLINE (FOR THE DECEMBER 2011 STANDARDS BOARD MEETING SERIES). IF NO RESPONSE IS RECEIVED, THE STANDARDS IN QUESTION WILL BE PLACED ON THE AGENDA FOR ADMINISTRATIVE WITHDRAWAL.

The following standards are currently on the Administrative Withdrawal List:

1247-2005 IEEE Standard for Interrupter Switches for Alternating Current, Rated Above 1000 Volts

Work initiated to replace this document. PARs will be submitted for C37.30.3 and C37.30.4

1291-1993 (R2005) IEEE Guide for Partial Discharge Measurement in Power Switchgear

Allow to be withdrawn. Replaced by C37.301-2009

C37.04-1999 (R2006) IEEE Standard Rating Structure for AC High-Voltage Circuit Breakers

[Also: **C37.04a-2003 (R2006)**]

PAR filed in 2011. Request to extend life of document until revision work is complete.

C37.10.1-2000 (R2006) IEEE Guide for the Selection of Monitoring for Circuit Breakers
Extension request will be filed. WG chair will consider starting a Reaffirmation to obtain comments for use in the upcoming revision.

C37.13.1-2006 IEEE Standard for Definite Purpose Switching Devices for Use in Metal-Enclosed Low-Voltage Power Circuit Breaker Switchgear
C37.13.1a-2010 version is active on website. Base document is missing. Reaffirmation ballot is in progress (comment resolution phase). The document should remain active until submitted to REVCOM for reaffirmation approval.

C37.20.3-2001 (R2006) IEEE Standard for Metal-Enclosed Interrupter Switchgear
PAR Extension filed in 2011. Work continues on the revisions. Request to extend document life until work is complete in 2012.

C37.20.4-2001 (R2006) IEEE Standard for Indoor AC Switches (1 kV - 38 kV) for Use in Metal-Enclosed Switchgear
PAR Extension filed in 2011. Work continues on the revisions. Request to extend document life until work is complete in 2012.

C37.30-1997 IEEE Standard Requirements for High Voltage Switches

C37.34-1994 IEEE Standard Test Code for High-Voltage Air Switches

C37.35-1995 IEEE Guide for the Application, Installation, Operation, and Maintenance of High-Voltage Air Disconnecting and Interrupter Switches

C37.36b-1990 (R1996) IEEE Guide to Current Interruption with Horn-Gap Air Switches

C37.37-1996 IEEE Loading Guide for AC High-Voltage Air Switches (in Excess of 1000 V)

All documents listed here are part of the work under C37.30.1 and it is requested that the life of each be extended until that work is complete. A PAR extension was given until December 2011 to allow additional time for comment resolution on C37.30.1. The results will be submitted to REVCOM by 17 Oct 2011. Upon approval of C37.30.1 by REVCOM, these documents may be withdrawn.

C37.63-2005 IEEE Standard Requirements for Overhead Pad-Mounted Dry-Vault and Submersible Automatic Line Sectionalizers for AC Systems
PAR approved 16 June 2011. Request to extend life until work is completed.

C37.74-2003 IEEE Standard Requirements for Subsurface, Vault, and Padmounted Load-Interrupter Switchgear and Fused Load-Interrupter Switchgear for Alternating Current Systems up to 38kV

PAR filed in June 2009 – Expires in 2013. Document is in comment resolution phase of balloting. Based on the “filed” date we have two years to finish. Why is this on the list?

C37.100-1992 (R2001) IEEE Standard Definitions for Power Switchgear

Document is stable. No activity is planned, however definitions contained are still valid. This was to be replaced with the online dictionary. A request to continue to extend the document life until the electronic dictionary and associated procedures are fully developed.

3. PROJECT STATUS

The following is a list of projects which will expire if no action is taken to extend their life. I ask that all the working group chairs review this list and take the appropriate action as follows:

If these projects will not be submitted to RevCom by the submittal deadline for the December 2011 meeting, you need to take one of the following steps:

1. Request an extension for the project (PAR). Please note that extension requests are usually granted from one to two years. Significant justification must be provided for an extension request which exceeds two years.
2. Request withdrawal of the project (PAR).

Log on to myProject (<https://development.standards.ieee.org/my-site>) to submit a request for either of these actions under the link for 'Submit a PAR'. Once submitted, the request to Extend an Approved PAR or the request to Withdraw an Approved PAR will be placed on the agenda of the next scheduled NesCom meeting. NesCom will make its recommendation based upon the information provided.

The following PARs are due to expire and action is required:

PC37.17 Standard for Trip Systems for Low-Voltage (up to 635 V) AC and General Purpose Low-Voltage (up to 600 V) DC Power Circuit Breakers

PAR Approved in June of 2010 and again in June of 2011 (2 active PARs on file). The document has been submitted to REVCOM for approval.

PC37.20.3 Standard for Metal-Enclosed Interrupter Switchgear

PAR Extension request filed

PC37.20.4 Standard for Indoor AC Switches (>1kV – 38kV) for use in Metal-Enclosed Interrupter Switchgear

PAR Extension request filed

PC37.20.6 Standard for 4.67kV to 38kV Rated Ground and Test Devices Used in Enclosures

Document is dated 2007. This means it expires in 2012. Why is it on this list?

PC37.30.1 Standard Requirements For High Voltage Air Switches And Interrupting Switches for Alternating Current, Rated Above 1,000 Volts

Document in Ballot process (comment resolution phase). 96% affirmative at this time. The document will be sent to REVCOM by 17 Oct 2011.

PC37.68 Guide for the Requirements for Microprocessor-Based Controls for Distribution Pole-Mount and Padmount Switchgear Rated above 1kV up to 38kV

Allow to expire.

PC37.74 Standard Requirements for Subsurface, Vault, and Padmounted Load-Interrupter Switchgear and Fused Load-Interrupter Switchgear for Alternating Current Systems up to 38 kV

PAR was Approved in June 2009 should not expire until 2013. Why is this on the list?

If there is no response to this notification by the 17 October 2011 NesCom/RevCom submittal deadline, the PAR will be recommended for administrative withdrawal at the December 2011 IEEE-SA Standards Board meeting.

These lists were generated in April of 2011 and may no longer reflect the correct status of every document and project. Please advise me as to any updates in the Subcommittee minutes. I will contact the SC Chairs later in the year to establish the action that will be reported to the Standards Board.

Reported 13 October 2011.

Michael Wactor
Standards Coordinator
