4. PAR Status

The chair reported that the PAR was approved as submitted on 3/31/11 and is valid through 12/31/15.

5. Review Changes to C37.16

The working group reviewed comments to draft D2 of the document which had been circulated following the Spring meeting. It was reported that the DC Tables have been transferred to C37.14 per the discussion at the Spring meeting. There were only two comments requiring discussion as the others were editorial. The first involved whether 1200A should be included as a preferred frame size. Following discussion, the chair took a straw vote and the majority of the working group members favored inclusion of 1200A as a preferred frame size. The second comment was a proposal to incorporate the remaining tables into C37.13 since there is very little content remaining. Following discussion regarding the historical reasons that the tables were in a separate document, it was unanimously decided to recommend to LVSD that the remaining tables be incorporated in the next revision of C37.13. The working group will remain active until action is taken by LVSD. There were no other changes suggested.

Meeting was adjourned at 2:00pm.

Respectfully submitted by Allan Morse, Chair
