

Minutes for Working Group C37.30.3
St. Pete Beach, FL
April 30, 2012

The WG met during two afternoon sessions on Monday 04/30/2012

- Greeting and Introduction
- Approval of F'11 meeting minutes.
- 17 attended either or both meetings
 - 11 attendees were members or request to be a member
- WG held discussion and approved
 - C37.30.3 will be a comprehensive document that encompasses both type of devices that were produced and tested per C37.30/32/34/37 and IEEE 1247. This document will define the interrupter switches that are pulled out of newly approved C37.30.1, and provide ratings for IEEE 1247.
 - WG accepted that there will be two separate temperature rise tables and other similar cases.
 - QB whip (Quick Break Arc Horns) will be part of standard.
 - To simplify and keep current, the standard will refer to other standards when it can (ie C37.30.1, C37.100.1,)
 - This standard will have ratings up to and including 800kV
- A letter to be drafted to invite all manufacturers that produces interrupter switch, or interrupting device within scope of this standard to attend or voice their comments to assure proper representation of their equipment.
- Adjournment
