

STLNA Meeting Minutes
St. Pete Beach – May 2012
Kirk Smith – STLNA Management Chair

The committee met on Tuesday night. There were two new lab representatives at the meeting; 1 from LaPEM in Mexico and 1 from AREVA, Brazil.

One key topic under discussion is the effect of neutral current during arc resistance switchgear testing. Two test circuits from KEMA, Arnhem, Netherlands and KEMA Powertest, Chalfont, PA, USA are being compared.

A second topic of discussion concerns the effect of test circuit arrangements on TRV and other test parameters.

STLNA representatives will attend the STL Management Committee meeting in May and the STL Technical Committee in November.
