Document "Draft 1.0" was reviewed and general discussion took place. Several assignments were made to offer detailed monitor parameters for breakers by voltage class both for vacuum and SF6 gas. These comments are to be submitted or before June 24th and "Draft 2.0" be distributed to the WG by mid July.

The timeline for our working group's efforts are to review "Draft 2.0" in the fall 2013 meeting. Also go to ballot after the first of the year in order to review ballot comments in our spring 2014 meeting.

Dave Mitchell
