The document was sent out for a recirculation ballot before the spring meeting. Rogue comments were received and included with comments from the ballot pool for a total of 91 comments. All comments were addressed. However, decisions on a number of comments were differed until these areas could be discussed at the Switchgear Assemblies Subcommittee meeting. The two major areas include replacing the word paint with organic coating and clauses requiring harmonization with C37.20.2. The necessary revisions will be incorporated into draft 10 which will be sent out for a recirculation ballot.
