

# Task Force on Standardizing Test Reporting for LV Power Circuit Breakers

2013-09-18 San Antonio, TX

Chair: Jeff Mizener, Siemens Industry, Inc.

## Agenda

- 1) Introductions
- 2) Discussion of what belongs on a test report
- 3) Discussion of what tests should be performed and how
- 4) Next steps
- 5) Adjourn

The meeting was called to order at 8am and adjourned at 9:35am

## Notes:

5 attendees + chairman (6 manufacturers, 0 users)

An outline of what should be on a test report was presented, along with a list of tests that are commonly done.

The outline was edited and fleshed out to reflect the experiences of the attendees. This list will be forwarded to the attendees for further expansion and comment.

## Next steps:

Those in attendance will circulate the outline to their service organizations and see what changes are needed.

Determine how to instantiate this TF officially.
