Date: 21-Sept-2015

Attn: Switchgear Committee

Subject: TCPC Activity

Dear Fellow Switchgear Committee Members:

Due to recent construction activity at my new job in the Eaton Belmont Test Lab, I will be unable to attend this fall's IEEE meeting in San Diego, CA. Since I will be absent, I would like to submit a report on our latest activity. Last year our committee reviewed papers for the IEEE PES General Meeting held in Denver, CO. Ted Olsen and I traveled to the IEEE PES General Meeting for the event.

This year, we are currently reviewing papers for the IEEE PES T&D Conference & Exposition to be held in Dallas, Texas on May 2, 2016, so we will be reviewing papers for two conferences a year instead of one.

We received four papers to be reviewed for IEEE PES T&D conference.

Twenty members of our committee graciously agreed to be reviewers for the papers. I appreciate the assistance you have given during this process.

We have requested updates for one of the four papers that we reviewed, and we are still reviewing a second paper. The reviews for this paper must be submitted by September 28, 2015.

Thank you to everyone that aided in this process. I hope to see our database of authors and reviewers continue to grow. Please remember that reviewers do not have to be members or our committee.

I look forward to seeing all of you next at the Spring IEEE Meeting in Hilton Head, SC.

Amy W. Rowell
