**1:30 PM – 3 :15 PM (PDT), October 7, 2019**

**6. Working Group/Task Force Status Reports**

- a. C37.13 : IEEE Standard for Low-Voltage (1058 and Below) AC Power Circuit Breakers Used in Enclosures
  - i. Keith Flowers Task Force Chair
  - ii. 12 members 22 guests, Quorum met
  - iii. Topics: Aging for lubricants (Mechanical and time related)
  - iv. Form a task force for Investigating a Standard Method for evaluating lubricants used in circuit breakers. Unanimous decision to proceed. Doug Edwards agreed to be the task force chair.
  - v. Change title to include voltage rating "(1058 and Below)"

5. Which type of document? D. Edwards
- Standard
  - Recommended Practice
  - Guides
  - Trial-Use

Discussed which type of document would likely be appropriate. Consensus was:

- Not Standard or Trial-Use Standard
- Most likely a Guide
- Maybe Recommended Practice.
- For now, move forward with likely choice to be a Guide.

6. Title D. Edwards  
Drafted working title of "Draft Guide for Evaluation of Aging and Life of Lubricants Used in Switching Devices"

7. Scope D. Edwards  
Drafted working Scope of "This guide provides methodologies to demonstrate the expected service life of lubricant(s) used in a switching device."

8. Purpose D. Edwards  
No actions taken to draft a Purpose statement.

9. Document Section Structure D. Edwards  
Discussed concepts of having sections to discuss Theories, concepts such as:
- Arrhenius method
  - Q10 temperature coefficient
  - Worse case conditions

Decision was to share documents for general education to spur and support future discussions.

10. Other discussion points D. Edwards  
Nothing specific to report.
