

ADSCOM Report

Fall 2020

1. STANDARDS COORDINATORS REPORT

All documents are on a 10-year maintenance cycle. There is no reaffirmation process. Activity to revise documents must occur during that time period. The document cannot be reaffirmed as a stop-gap while the revision takes place.

The information in items 2 and 3 come from IEEE SA and the myProject website. If there are any inaccuracies, please bring them to my attention.

2. DOCUMENT STATUS

The following Switchgear documents are scheduled for Administrative Withdrawal on 31 December 2020.

Please note that having an active PAR does not extend the life of the standard.

These documents must be submitted to REVCOM no later than 13 October 2020.

ADSCOM

C37.301-2009* IEEE Standard for High-Voltage Switchgear (Above 1000 V) Test Technique – Partial Discharge Measurements
***This document was scheduled for Administrative Withdrawal 2019**
PAR is approved/Working Group is active. PAR active until 2021.

HVCB

C37.017 IEEE Standard for Bushings for High-Voltage [over 1000 V (ac)] Circuit Breakers and Gas-Insulated Switchgear
***This document was scheduled for Administrative Withdrawal 2019**
PAR is approved/Working Group is active

HVF **All documents current**

HVS **All documents current**

LVSD **All documents current**

RODE

C37.66-2005* IEEE Standard Requirements for Capacitor Switches for AC Systems (1 kV to 38 kV)

***Document was allowed to be withdrawn. PAR extension was approved so it may be reinstated early 2019. Shows as Withdrawn 2018.**

Extension request submitted to NESCOM 6 Oct 2020.

SASC **All documents current**

3. PROJECT STATUS

The following PARs will expire 31 December 2020.

If these projects will not be completed and sent to RevCom by the submittal deadline for the December meeting, you need to take one of the following steps:

1. Request an extension for the project (PAR). Please note that extension requests are usually granted from one to two years. Significant justification must be provided for an extension request which exceeds two years.

2. Request withdrawal of the project (PAR).

PAR extensions or modifications can be made on myProject.

(<https://development.standards.ieee.org/myproject-web/app#>)

PC37.62 IEEE Standard for Pad Mounted, Dry Vault, Submersible Fault, and Overhead Fault Interrupters for Alternating Current Systems up to 38 kV

PC37.66 IEEE Standard Requirements for Capacitor Switches for AC Systems (1 kV to 38 kV) **Note- The document associated with this PAR was withdrawn in 2018.**

Extension request submitted to NESCOM 6 Oct 2020.

PC37.30.1

IEEE Standard Requirements for AC High-Voltage Air Switches Rated Above 1000 V

Extension request submitted to NESCOM 5 Oct 2020.

The Standards Board work load is always substantial in December and they request PAR extension requests be sent in earlier where it is possible. The list below shows the meeting dates and associated deadlines. If you know you need an extension, please send it to the earliest possible meeting.

Deadline for REVCOM/NESCOM Submittals

13 October 2020

If there are any errors or omissions, please bring them to my attention.

Reported 8 October 2020

Michael Wactor

Standards Coordinator
