ONLINE Virtual Meeting

Saturday, March 20th, 2021 10:00 AM- 11:30 AM US-CDT(Houston-Chicago)

TOPIC: "During Covid-19 How Can Technology Help,"
Speaker: Fawzi Behmann, IEEE ComSoc Distinguished Speaker

Presentation:

We are witnessing rapid advancement in disruptive technology such as the Internet of Things (IoT), Artificial Intelligence (AI), wireless technology and security and others that will enable building and providing tools with multiple applications. However, with Covid-19, the world has witnessed early 2020 and for over a year a disruption to our normal daily life. Work, school, medical services, transportation, shopping, gyms, restaurants, entertainment, travel, conferences, and many others are being redefined. In many cases, technology have shifted and accelerated to what is urgent. IoT and AI have become innovative to address these new challenges with great levels of creativity and innovation.

Mr. Behmann will touch briefly upon Covid-19 and worldwide impact and then address some areas of technology such as sensing, wearables, mobile devices, smart tools, and systems. He will walk through some examples and welcomes the opportunity for audience discussion. His talk will conclude looking at the future as to how technology will help improve quality of life and business operations.

PRESENTER:

Mr. Fawzi Behmann has over 35 years in industry and held various executive and leadership positions with Tier 1 companies in the areas of communications & networks spanning semiconductor, communication systems and service providers.

Mr. Behmann founded TelNet Management Consulting Inc. in 2009 offering consulting services in the areas of technology trends, positioning and development of smart networking ecosystem solutions. He explores disruptive technology enablement such as IoT, 5G, virtualization, big data/analytics, and security across multiple markets.

He is the chair for Wireless Communications and Networking Conference (WCNC) 2022 and has organized several events such as smart city summit (2019), Blockchain for Healthcare (2018) and Greentech of Smart Cities (2018) and Advanced technologies in Healthcare (2017). Mr. Behmann has been a keynote speaker at several conferences, distinguished lecturer at different domestic and international events and organized panel session at Globecom, International Conference on Communications (ICC), Healthcare Information and Management Systems Society (HIMSS), Biomedical Health Informatics (BHI), Smart connected cities, Enterprise IoT, and others. He has published several publications and co-authored the book on "Collaborative Internet of Things for Future Smart Connected Life and Business" published by Wiley.

THIS EVENT IS ORGANIZED JOINTLY BY IEEE-Galveston Bay Section, and Washington DC ComSoc Chapter

The presentation is FREE and open to all Interested IEEE and non-IEEE members.

Registration is required by Friday March 19th 2021 COB to attend.
