IEEE 802 / IETF COORDINATION

DCN ec-12-0078-00-00EC

Current status

- Activity initiated in March 2012 after liaison from 802.1 to IETF about some areas of concern
- Face-to-face leadership meeting in July and bi-monthly calls
 - Covering positive opportunities for collaboration as well as areas of overlap or conflict
- Developed a list of 19 areas for coordination
 - Some issues have already been resolved
 - Some are longer term
- Updating RFC 4441 IEEE 802/IETF relationship
- Next face-to-face on 16 March 2013

IEEE 802 / IETF website

- <http://www.ietf.org/iesg/ieee/>

Revision of rfc 4441

- March 2006 RFC documents a few specific areas where we interacted then
 - E.g. MIBs, security, Ethertype allocations
- Today we need a more general guide to collaboration
 - Increasing need to work together areas such as mobility
 - More overlap and interaction between areas we specify

Rfc 4441rev draft

- <http://tools.ietf.org/html/draft-dawkins-iab-rfc4441rev-01>
- Includes
 - Overview of organizations
 - Cultural differences
 - Exchange of information
 - Active and new work, document access, participation in review
 - Mailing lists
 - Cross referencing
 - Registration authorities
- Fairly complete draft
- Process for IEEE 802 review?

Planning for next face-to-face

- Saturday, 16 March 2013
 - Inform and invite Konstantinos Karachalios Karen Bartelson and Steve Mills
- Topics
 - RFC 4441rev
 - Update on coordination list
 - World Conference on Information Technology – reviewing impact
 - Joint positions on ITU issues and advocating OpenStand model
 - Meeting in the future
