This is a general comment regarding Intellectual Property.

The use of PoE has been the subject of multiple litigations from NPEs (Non Practicing Entities), otherwise known as "Patent Trolls".

Two in particular, Chrimar Systems and Network 1, have litigated against a significant group of companies in the Ethernet industry who ship products that implement PoE. Since 802.3bt increases the available power, this will no doubt attract new companies to utilize PoE in many new applications.

What assurances have been made by companies who believe they have intellectual property that relates to 802.3bt (by at least Chrimar Systems and Network 1), such that licensing under RAND terms can be secured?

SuggestedRemedy

REJECT.

Issue a much stronger warning indicating the use of 802,3bt may result in alleged infringement of Intellectual Property,
