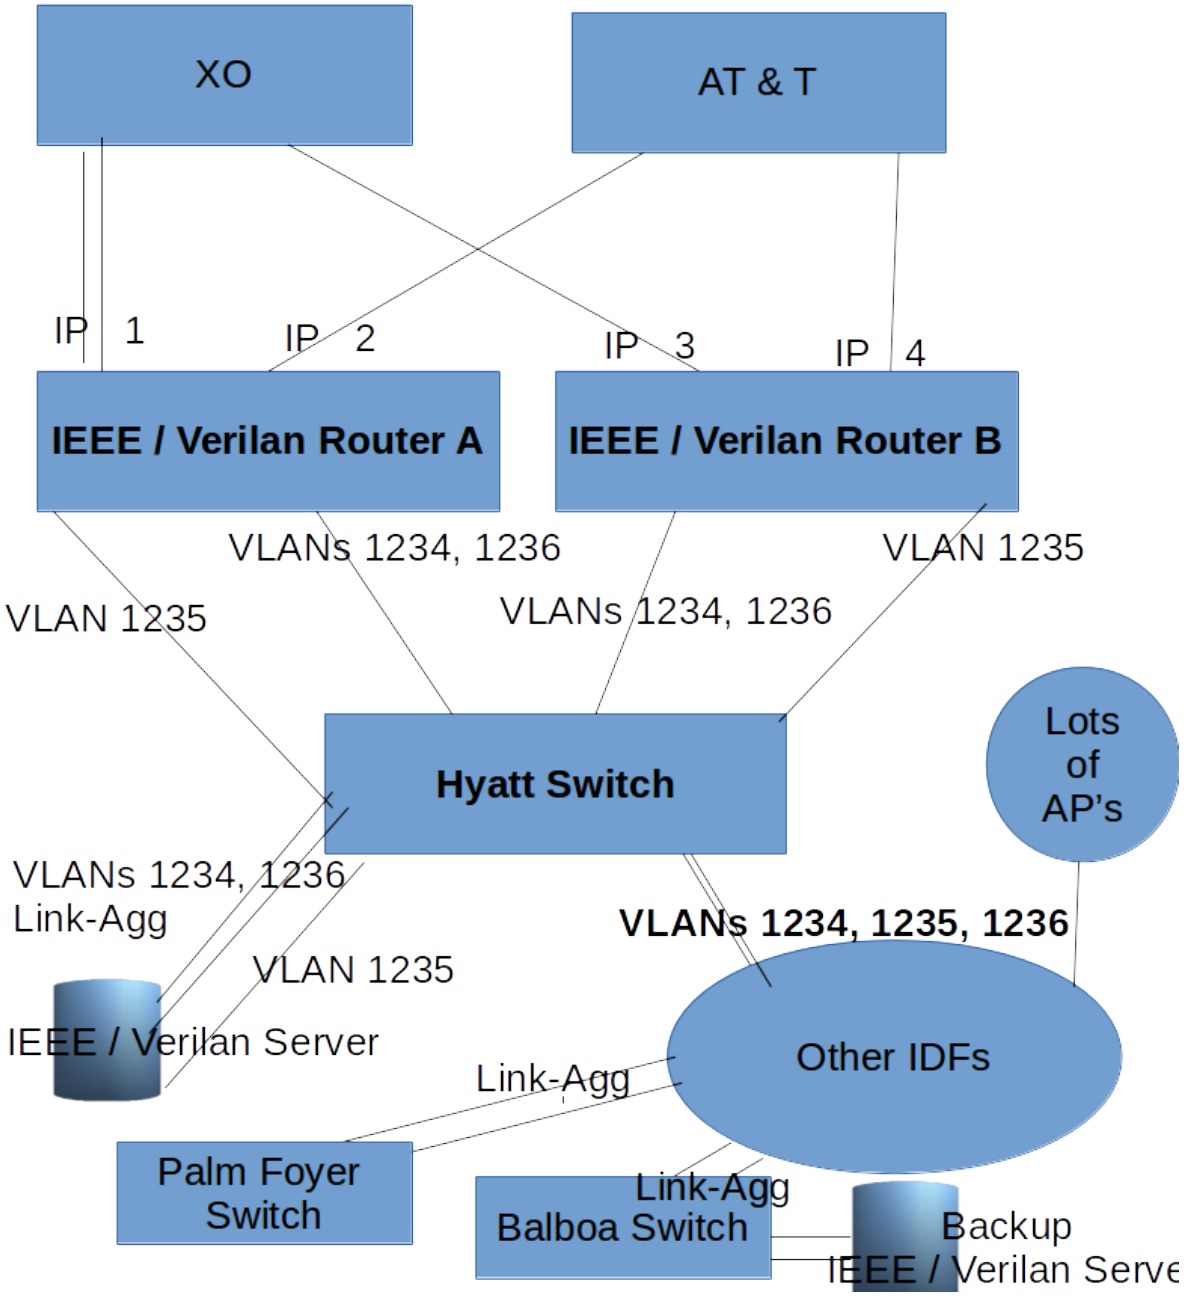
IEEE 802 / Verilan
July 5 – 14
MDF Configuration
VLAN 1234 – Attendee / WiFi Traffic
VLAN 1235 – Management
VLAN 1236 – Other

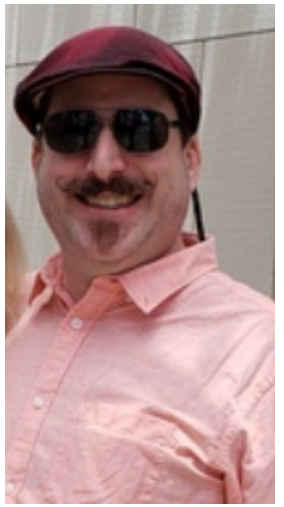


Mentor and Drafts, a haiku

Mentor synching broke

Brought Computer Scientist

Web-scrape workaround

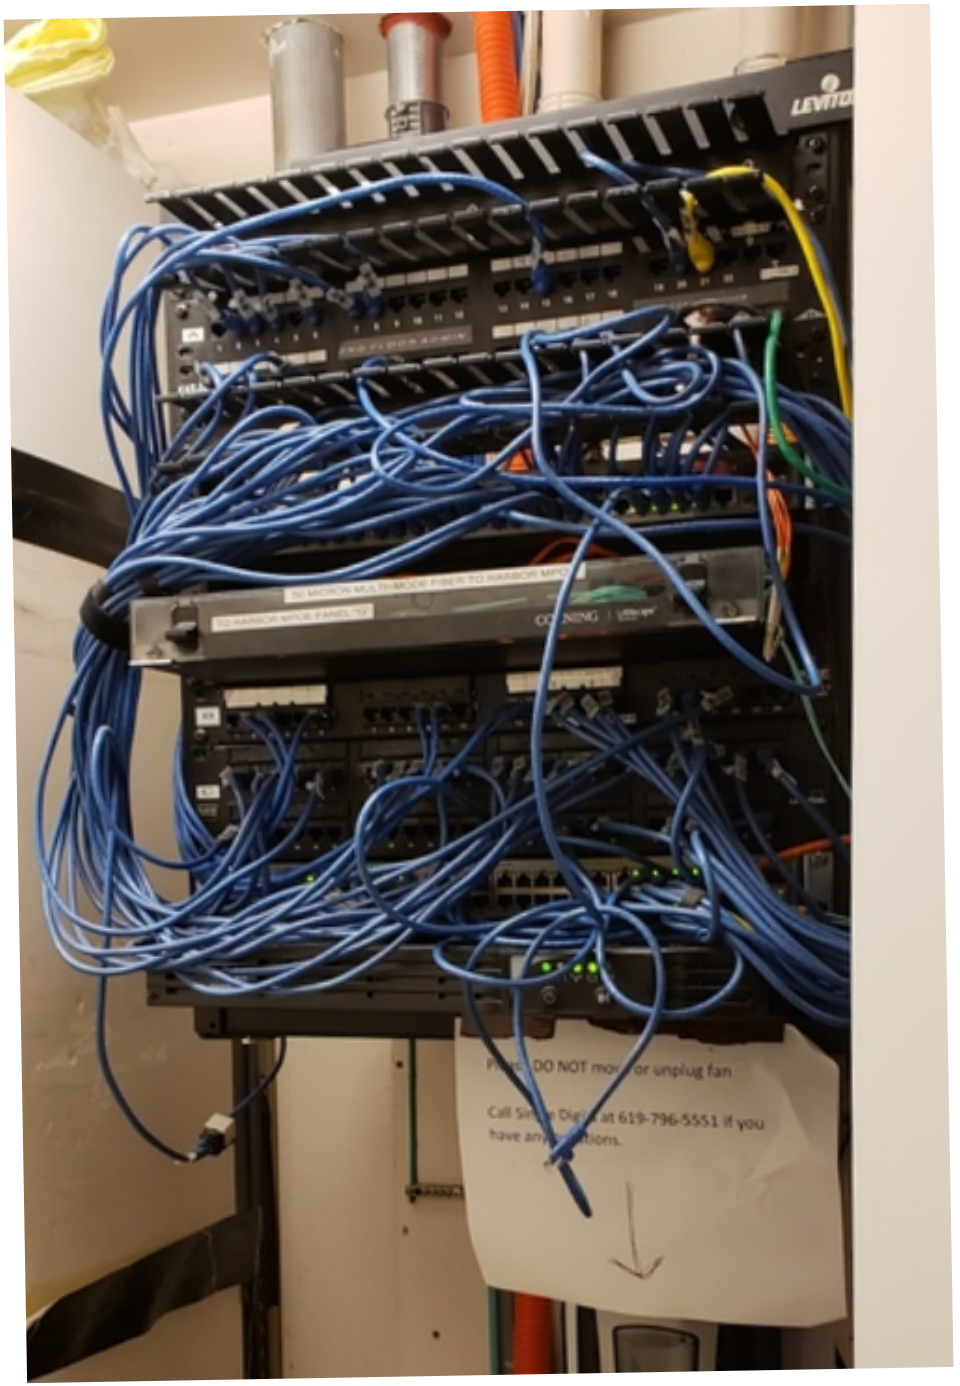


GRAND
HALL C
GRAND
HALL D

Mostly out of wiring closets this meeting

IMAT outage for 3 minutes, switching to a new IP

Firewall misconfig – 2 minute logical outage



The numbers

- 1550 DHCP Leases. ~2 devices per attendee plus some hardware.
- Peak traffic of ~350Mbit.
  - Less once we kicked off the bit torrenters
- Sustained traffic between 150Mbit and 200Mbit all week.

Thanks

Thanks for letting us be a part of the process.

- Reid, Geofry and Bret
