# IEEE P802.3cu 100 Gb/s and 400 Gb/s over SMF at 100 Gb/s per Wavelength to Standards Association Ballot

4 unsatisfied “TR” comments from 1 commenter

<https://mentor.ieee.org/802-ec/dcn/20/ec-20-0129-01-00EC-ieee-p802-3cu-unsatisfied-wg-comments.pdf>

The unsatisfied comments are associated with the two optical PMD clauses.

- CI 140: 100GBASE-FR1 and 100GBASE-LR1 SMF PMDs
- CI 151: 400GBASE-FR4 and 400GBASE-LR4-6 SMF PMDs

With the increasing industry experience with 100 Gb/s per wavelength SMF specifications and product development, P802.3cu has had proposals to update or improve methodologies for specification (compared to 802.3bs and 802.3cd standards). These changes were rigorously tested for consensus before adopting. The unsatisfied comments are associated with comments not aligned with the consensus position that was achieved.

Topic	# Unsatisfied Comments	More information
Removal of TDECQ-10logCeq parameter	3	Numerous Straw Polls and motions since January to reach current situation
Proposed name and limit change to Tx pk-to-pk power parameter	1	Related to overshoot methodology change which had numerous straw polls and motions since January to reach current situation. Proposed comment change had no supporting data and no consensus existed to make change.
