Chair asked WG / TAG Chairs to share their observations in relations to electronic meetings and productivity. Feedback on electronic meetings was wide ranging: productive, time-zone challenge, work progressing, numbers up, workload increased, logistics difficult, miss in person impromptu collaboration, lower barrier to entry for participants, time to develop consensus takes longer, stretching out to two weeks helps reduce time slot contention and burn-out, lack of hallway conversations detrimental to innovative thinking, people take comments too seriously.

There was debate regarding the scope of the proposed study group formation. One expressed opinion was that it stretched the scope of 802.15.6, while another doubted it was within the scope all together. It was argued that the proposed study group should be allowed to study the topic and determine whether its proposed effort was within scope.
