Dear Roger,

To add to Lynne's comments, we are very keen that this document reaches a wide audience, so welcome your offer to promote it to your group and would appreciate any feedback they have. We are also engaged with TIA Smart Buildings, CBRS Alliance on this project as well as Commercial Property associations in order to refine the guidelines and raise awareness indoor small cell deployment.

As Lynne says, our preference is always to direct traffic to our site, so we can track interest as well as ensure the latest versions are used. The document is freely downloadable here:

"Making Buildings Small Cell Ready" Small Cell Forum, Feb 18, www.scf.io/doc/214

If you would like a document to upload to your site, the attached provides a summary and includes the above link to the download page. I hope this meets your needs.

~

On related note, I see your group is looking at the next decade, which is something SCF has also been considering this past year. We have developed a set of roadmaps for "densification into the 5G Era" showing the sequence of investments for the industry, both in terms of technology but also for operational and commercial aspects. I think this work might also be an interesting input for your group. The overview of this work with the various roadmaps can be found in:

"Densification into the 5G Era: Overview", Small Cell Forum, Dec 17, www.scf.io/doc/110

Thanks for your interest and please do share any feedback you have.

Regards

Julius

Subject: RE: usage of Document SCF214

Hello Roger

Thank you for your interest in the work of the Forum and we are pleased to hear of your specific interest in SCF214.

As you will appreciate, the research and creation of these documents requires considerable resource and expertise. How our documents are downloaded provides important analysis information, which in turn supports the continued drive for evolving the Release Program.

It is important the body of documents continues to only be downloaded direct from Small Cell Forum's resource centre. Therefore, in accordance with our terms and conditions, it will not be possible for you to store or introduce into your retrieval system, any of the Release documents.

Kind regards
Lynne

Subject: usage of Document SCF214

Dear Small Cell Forum,

I would like to enquire regarding the usage of a Small Cell Forum document (SCF214, on "Making buildings small cell ready").

I am Chair of the IEEE 802 "Network Enhancements for the Next Decade" Industry Connections Activity (Nendica). My request is to post the document to the document server provided by IEEE for use in Nendica discussions. I believe that the participants would benefit from study of this document.

The Nendica web site is available at <<https://1.ieee802.org/802-nendica/>>.

I am aware of the Small Cell Forum Terms, Conditions and Disclaimer at <http://scf.io/en/terms_conditions_and_disclaimer.php>. Nevertheless, I would very much appreciate a statement of your approval for my intended use.

Regards,

Roger Marks
Chair, IEEE 802 Nendica
Second Vice Chair, IEEE 802 Executive Committee
