Re: [TG4g Letter Ballot Comment Resolution]

Abstract: [LB59 Proposed Resolutions for Frequency Band Comments]

Purpose: [Technical proposal. Presented to the 802.15.4g SUN Task Group for consideration.]

Notice: This document has been prepared to assist the IEEE P802.15. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein.

Release: The contributor acknowledges and accepts that this contribution becomes the property of IEEE and may be made publicly available by P802.15.

LB59 Proposed Resolutions for Frequency Band Comments

19th January 2011

Khanh Tuan Le

CID 517

- CID 517

Comment:

MR-FSK PHY should be defined at the 779-787 MHz as well.

Proposed change:

Add the MR-FSK PHY to the 779-787 MHz frequency band.

Proposed resolution:

AP: Add the MR-FSK PHY to the 779-787 MHz frequency band using the same parameters as specified in the 470-510 MHz band (P802.15.4g/D2).

CID 539

- CID 539

Comment:

The 779-787 MHz band should be included in the Table 6a.

Proposed change:

Add 779-787 MHz as one of the frequency bands in Table 6a.

Proposed resolution:

A.

CID 955

- CID 955

Comment:

There is no FSK defined for 779-787 MHz band.

Proposed change:

At least one FSK mode shall be defined for 779-787 MHz band.

Proposed resolution:

AP: Resolved by CID 517

CID 547

- CID 547

Comment:

The footnote about channel bundling at the 863-870 MHz frequency band (Europe) is not correct.

Proposed change:

Remove the footnote indicating channel bundling at the 863-870 MHz frequency band.

Proposed resolution:

A.

Thank you!
