Re: []

Abstract: [Proposed resolution about comment CID 43]

Purpose: [Contribution to IEEE 802.15.7 TG-VLC]

Technical comment CID 43

❖ **Comment 43**

◼ **"CVD disable" and "CVD_disable" are just too similar to avoid confusion. It took me a while to figure out there was a distinction**

❖ **Proposed change**

◼ **Use name that are not so similar**

❖ **Accept the comments.**

◼ **There's confusion with similar name between "CVD disable" and "CVD_disable"**

Instruction to Editor

❖ **Change the "CVD_disable" into "CVD usage option" in the subclause 5.3.18**

❖ **Change table 13 as following table.**

bits: 0	1−7
CVD usage option	Reserved
CVD usage option subfield explanation Bit 1 : '1' indicating that device shall transmit the CVD frame Bit 0 : '0' indicating that device shall not transmit the CVD frame and may use out−of−band idle patterns if visibility needs to be maintained
